

J plate

The J plate offers an ideal space to place spliced fibers temporary, which would help for smooth handling of fibers during splicing work. The J plate is exclusively designed for Fujikura's Arc Fusion Splicer, and it can simply be hooked on behind the tube heater. After tube-heating, the protection sleeve may be put onto the J plate for placing and cooling down.

Specification:

Size	L123 x W20 x H26 mm
Weight	31 g
Attaching position	Rear-top of splicer
Capacity	Approximately 20 pieces with 99840 (Single fiber protection sleeve, 60mm length)
Thickness of plate	1 mm
Material	Stainless-steel
Use for	Fujikura's Arc Fusion Splicer, FSM-50S, FSM-50R, FSM-17S, FSM-17S-FH, FSM-17R
