

# PoE Checker NF-488

Brand Name : **Noyafa**

Main Function : **Detecting PoE voltage, current, power, PSE standards Power supply modes, Verify RJ45 cables**

Power : **DC1.5V x 3 (not included)**

Warranty : **1 year**

## Main Functions

- Test the information of the standard PoE device, such as a flat standard, power supply voltage, power supply polarity and mode.
- Identify the supply voltage, power supply polarity and mode of non-standard PoE devices.
- Check the short circuit, crossover and open circuit status in the network cable.
- Test the current, voltage and power consumed by DC appliances.
- The loop-back test function of the switch.

NF-488 Transmitter specification		
Indicator	LCD 128x64px with back light	
Continuity function	Cable types	CAT5e,CAT6A, CAT7
	Check UTP/STP cab	YES
	Cable short indicate	YES
	Max testing range	600m
	Wire mapping	Emitter +Remote
		Emitter + switch/router
PoE function	Test range	DC5-60V POE switch
	Standard identify	802.3af/at (standard/non-standard)
	Test range power	0-18W
Power function	Output interface	YES
	Voltage test range	DC0-60V
	Current test range	0-3A
	power test range	0-180W
Input voltage protection	DC48V 5mA	
Max working current	≤80mA	

Loopback	Compatible with 10M ,100M,1000M switch	
Power supply	3*AAA	
<b>NF-488 Remote Specification</b>		
Ports	RJ45	
Function	Wire mapping for network cable	
Input voltage protection	DC48V 5mA	

**Accessories Included:**

Emmitter x 1 set

Remote x 1 set

Cable lead x 1 set

DC-DC Cable adaptor x 1 set

User manual x 1 set

Gift box x 1pcs

Carry bag x 1pcs
